Press Release

TWT amplifiers from TMD to feature at the EMCUK exhibition

TMD Technologies will be highlighting its wide range of TWT amplifiers for EMC applications at the EMCUK exhibition and conference in October this year.

The company's standard amplifier range covers 1–40 GHz at up to 500/1000 W continuous wave and 40 kW pulsed. With an international reputation for design innovation, TMD's UK-made products include many novel, high performance units.

Changing EMC testing standards continue to produce new technical demands, in particular the increasing need for higher powers over wide frequency ranges. TMD is well placed to meet this challenge, with its extensive experience in designing and manufacturing high power military radar amplifiers.

TMD works closely with its partners, antenna expert Q-par Angus Ltd and BONN Elektronik GmbH (solid state RF and microwave amplifier technology), to provide optimum sub-systems for the EMC testing market, particularly for HiRF testing.

-more-

TMD will be exhibiting jointly with Q-par Angus on Stand 15 at the EMCUK exhibition and conference, which takes place on 12-13 October 2010 in Newbury, Berkshire, UK. More information on the event can be found at www.emcuk.co.uk.

Notes for editors

TMD Technologies is one of the world's leading designers and manufacturers of specialised transmitters for radar and electronic warfare applications, high voltage power supplies and microwave tubes. The multiple Queen's Award winning company also produces a range of advanced commercial microwave amplifiers for EMC testing and scientific applications.
