TMD Technologies features in UK government *Annual Parliamentary Review.*

TMD Technologies Limited (TMD), West London based, world class manufacturer of professional microwave and RF products, is featured in the prestigious, just-published government 2016/17 *Parliamentary Review*.

Selected to share 'best practice' in the publication, alongside and under the auspices of Prime Minister Theresa May, TMD is one of a small number of outstanding manufacturing organisations chosen to appear in the definitive *Parliamentary Review* document that looks back on the year in industry and government at Westminster. The *Parliamentary Review* is now a key feature of the UK's political calendar, with its main aim to highlight best practice as a learning tool to the public and private sectors.

TMD's Executive Chairman, Peter Butcher: 'TMD has earned itself an enviable global reputation.'

Peter Butcher, Executive Chairman of TMD commented "We were very pleased to be considered one of the few 'outstanding manufacturing organisations' eligible to have a company profile featured in the latest *Parliamentary Review*. Since our MBO from Thorn EMI Electronics in 1995, TMD has initiated and maintained exceptional and on-going growth in hi-tech design and manufacture, and has earned itself an enviable global reputation for specialised microwave innovation and reliability.

Today we operate truly worldwide, with an international network of customers and representatives. More than 90% of our products are exported – mainly to the States through our new USA company based in Maryland.”

At its progressive design and manufacturing facility in West London, TMD produces its extensive range of specialised microwave products for radar, EW, communications, EMC, scientific and medical applications. Shown: Microwave tube assembly in a clean environment.

Adding to Peter Butcher’s comments, the *Parliamentary Review*’s director Daniel Yossman said: “It is companies like TMD Technologies and other hard working organisations from across the country that have come together to make this year’s *Review* successful and possible. Sharing knowledge and insight with both peers and government is essential work and I am delighted that this year’s *Review* will reach every corner of the British economy.”

Summing up, the Prime Minister’s former cabinet colleague Sir Eric Pickles, who was recently appointed as the *Review*’s chairman, said: “It has never been more important for government to hear the views of business and the public sector in a constructive forum. It is also a vital time to share best practice and progress.”

The *Parliamentary Review* is sent out to over half a million leading policymakers, across all policy areas. Articles in the *Review* act as both a blueprint for success and a template for reform.

TMD Technologies Limited – more than 20 years at the top of scientific and technical microwave and RF innovation

For more than 20 years TMD Technologies Limited (TMD) has been a world class designer and manufacturer of professional microwave and RF products. At the company headquarters in Hayes, West London it produces specialised transmitters, amplifiers, microwave power modules (MPMs), high voltage power supplies and microwave tubes for radar, EW and communications applications. A previous Queen's Award winner, it also produces a range of advanced instrumentation microwave amplifiers for EMC testing, scientific and medical applications.

TMD Technologies, LLC, USA

TMD Technologies, LLC is the US subsidiary of TMD Technologies Limited. Based in Baltimore, Maryland, it provides complete technical and commercial support to TMD's customers in the USA, and offers a comprehensive product and repair centre. The Sales and Marketing Department is engaged in the sales of the whole range of TMD's products, as well as new business development in the States.
