23 November 2017

### **Enhanced website for TMD USA further strengthens customer support**

TMD Technologies, LLC (TMD USA), world class supplier of professional microwave and RF products for radar, EW, communications, EMC testing, scientific and medical applications, has recently upgraded its company website to further support its growing customer base in North America.

*TMD USA's new website at [www.tmdus.com](http://www.tmdus.com)*

Tom Curtin, recently appointed to the new position of Vice President, Sales & Business Development\* to add impetus to TMD USA's growth and expansion program commented: "We wanted a more user-friendly website that would be accessible to a range of different users, including engineers mainly interested in technical details, buyers looking for product summaries and applications, and senior executives requiring background information and assurance that they are dealing with a world class company with an outstanding heritage and an enviable reputation for innovation and product reliability".

The improved website allows customers to download technical data sheets and provides downloadable product-specific capability brochures. Also, the latest developments in TMD's evolving product line-up of microwave power modules (MPMs), travelling wave tubes (TWTs), high voltage supplies, and commercial amplifiers will be posted to keep customers informed of the company's expanding technical road maps.

The new TMD USA website will be updated regularly to announce company information, new product releases, and relevant technical information.
