

PRESS INFORMATION**from TMD USA, Baltimore, Maryland***14 November 2017***TMD USA strengthens support for growing customer base with the
appointment of new Vice President**

To maintain and support its growing market and customer base in North America, world class supplier of professional microwave products TMD Technologies, LLC (TMD USA) has appointed Tom Curtin to the position of Vice President, Sales & Business Development.

North American expansion ...

Tom Curtin: 'A valued team addition'.

Commenting on the new appointment, Mike Farley, CEO of TMD USA, said; "Tom brings extensive hands-on experience in dealing directly with our DoD US armed forces and aerospace/defense prime contractors involved with radar, test equipment, and EW/ECM systems. As an industry veteran with over 25 years of technical sales and business development experience in the electronic design, manufacture and test industry, Tom is a welcome and valued team addition to our on-going expansion strategy and presence in North America".

“For a relatively new company, TMD USA has made tremendous progress”, said Tom Curtin, “supplying top class microwave transmitter products to our US DoD and aerospace/defense customers. Our London-based UK parent, with an unbeatable heritage dating back to the 1940s, provides the industry leadership, focus on quality and technical know-how that’s required to develop elite TWT based and solid-state microwave products. TMD’s product diversity and custom design capability are well positioned to address the most demanding land, air, and sea power applications.”

... and increased demand

TMD USA is seeing increased demand for higher power and higher frequency transmitters (Ka band and up) in small-form factor platforms. Recent TMD product developments are addressing these requirements providing improvements in power efficiency, low noise, and compact design.

The company is also experiencing rapid growth within its new line of modular instrumentation amplifiers, notably our latest TWT based, highly intelligent, modular PTCM Series amplifiers. Providing state-of-the art high power solutions for our customers engaged in critical EMC test and certification procedures is a TMD core competence.

The new PTCM Series operate over a frequency range from DC to 40 GHz.

As signal interference, spectrum congestion, and SWaP designs proliferate, so will the need for more accurate EMC testing – a requirement being fully addressed by TMD’s latest amplifier innovations and developments.

Summing up, Tom Curtin said: “An important part of TMD USA’s growth strategy includes strengthening our customer support with increased capacity to service, test and repair equipment at our home base in Baltimore, Maryland. To this end we have recently expanded our ISO certified lab capabilities, added more trained personnel, and significantly upgraded our test and measurement equipment”.

ENDS

TMD Technologies Limited – more than 20 years at the top of scientific and technical microwave and RF innovation

With a heritage dating back to the 1940s, TMD Technologies Limited (TMD) is a world class designer and manufacturer of professional microwave and RF products. At the company headquarters in Hayes, West London it produces specialised transmitters, amplifiers, microwave power modules (MPMs), high voltage power supplies and microwave tubes for radar, EW and communications applications. A previous twice Queen's Award winner, it also produces a range of advanced instrumentation microwave amplifiers for EMC testing, scientific and medical applications.

TMD Technologies, LLC, USA

TMD Technologies, LLC is the US subsidiary of TMD Technologies Limited. Based in Baltimore, Maryland, it provides complete technical and commercial support to TMD's customers in the USA, and offers a comprehensive product and repair centre. The Sales and Marketing Department is engaged in the sales of the whole range of TMD's products, as well as new business development in the States.
