TMD Technologies' recently acquired G2 Engineering, hi-tech, specialist microwave manufacturing company, is now producing its range of transponder products at TMD's premises in West London

TMD Technologies' recently acquired G2 Engineering Ltd, a specialist hi-tech microwave design and manufacturing company previously based in nearby Greenford, West London, is now operational and producing its range of transponder products at TMD's manufacturing facility in Hayes, West London.

Established some 18 years ago, G2 Engineering is experienced in the design and manufacture of a range of radar transponders and support equipment for applications that include UAVs, missiles, and manned aircraft. Prominent customers of G2 Engineering include MBDA and QinetiQ.

Said Dave Brown, TMD's Managing Director: "G2 Engineering is respected within its specialist area of the microwave and RF industry, and was well known to us because they supply many of the same customers as we do. This acquisition will benefit all – and offer increased potential for new business opportunities!"

Miniature transponder from G2 Engineering – now part of the TMD family of microwave and RF products.

TMD's product ranges are fully complementary with many radar, EW and comms systems requiring both TMD and G2 Engineering products – enabling TMD to offer an expanded, high value package to its customers, with all the advantages of more seamless integration and enhanced service.

TMD's new acquisition will initially trade as 'G2 Engineering Ltd, a TMD Technologies Company'.

G2 products at Farnborough 2018

Andy Crawford, TMD's Head of After Sales has overall responsibility for the sales and marketing of G2 Engineering products. He commented: "It's really exciting to be working on a new product portfolio - introducing these well established and technically advanced products to TMD's customer base. We look forward to showing a selection on our stand at Farnborough 2018". *(see Farnborough Preview press release to follow).*

TMD Technologies Limited – more than 20 years at the top of scientific and technical microwave and RF innovation

With a heritage dating back to the 1940s, TMD Technologies Limited (TMD) is a world class designer and manufacturer of professional microwave and RF products. At the company headquarters in Hayes, West London it produces specialised transmitters, amplifiers, microwave power modules (MPMs), high voltage power supplies and microwave tubes for radar, EW and communications applications. A previous twice Queen's Award winner, it also produces a range of advanced instrumentation microwave amplifiers for EMC testing, scientific and medical applications.

TMD Technologies, LLC, USA

TMD Technologies, LLC is the US subsidiary of TMD Technologies Limited. Based in Baltimore, Maryland, it provides complete technical and commercial support to TMD's customers in the USA, and offers a comprehensive product repair centre.

The Sales and Marketing Department is engaged in the sales of the whole range of TMD's products, as well as new business development in the United States.
