## ***PRESS RELEASE***

### **TMD Technologies Supports Charity CALM (Campaign Against Living Miserably)**

West London based electronics company TMD Technologies has been operating a charity of the year scheme since 2014, with a new charity being nominated by the workforce every year. On average we have made around £5,000 each year for the chosen charity, via a variety of events and challenges organized by staff.

This year we are supporting **CALM (Campaign Against Living Miserably)** which addresses the problem of male depression and suicide, the biggest killer of men under 45 in the UK.

<https://www.thecalmzone.net/>

This charity has special relevance to TMD as several members of staff have been personally affected by mental health tragedies.

We have already raised £1500 this year with such activities as a weekly lottery and abstaining from alcohol for a month! Future plans include a charity bake-off in May and an abseiling challenge in August.

In February CALM's Fundraising Director Anna Jones came to TMD to talk to staff and explain the work of the charity. Anna says "We at CALM are delighted that TMD is on-board and greatly value the contribution of its staff. There are two main aspects to CALM's activities; providing support to sufferers via a dedicated helpline and webchat, while running a programme to educate the public regarding male mental health issues. Our long term aim is to reduce the tragic incidence of male suicide in the UK"

## **TMD Technologies Limited – more than 20 years at the top of scientific and technical microwave and RF innovation**

With a heritage dating back to the 1940s, TMD Technologies Limited (TMD) is a world class designer and manufacturer of professional microwave and RF products. At the company headquarters in Hayes, West London it produces specialised transmitters, amplifiers, microwave power modules (MPMs), high voltage power supplies and microwave tubes for radar, EW and communications applications. A previous twice Queen's Award winner, it also produces a range of advanced instrumentation microwave amplifiers for EMC testing, scientific and medical applications.

### **TMD Technologies, LLC, USA**

TMD Technologies, LLC is the US subsidiary of TMD Technologies Limited. Based in Baltimore, Maryland, it provides complete technical and commercial support to TMD's customers in the USA, and offers a comprehensive product repair centre.

The Sales and Business Development Department is engaged in the sales of the whole range of TMD's products, as well as new business development in the United States.
