PRESS INFORMATION

TMD Technologies raises an impressive sum of money for the British Heart Foundation - *despite Covid-19!*

Hi-tech West London based electronics company TMD Technologies Limited (TMD) is pleased to report that, during this uncertain and unprecedented year, its staff have still managed to raise more than £3000 for charity!

TMD picks a different charity every year, and this time the charity selected was the British Heart Foundation – in memory of a TMD member who sadly died of heart problems recently. The British Heart Foundation (BHF) helps to fund research into all heart and circulatory diseases and their causes. Covid-19 has cut this important charity's ability to fund new research in half – so TMD's contribution was more welcome than ever!

TMD's activities to raise money for BHF included a raffle, mini-sweepstake, 'sponsored silence', 'sponsored head-shaving' and involvement in a 25 km Chiltern Challenge Trek. The company has been operating its 'Charity of The Year' scheme since 2014 and this year, with a workforce of around 180 rising strongly to the occasion, its total contribution has now exceeded £13,000.

TMD staff participated in this year's 25 km Chiltern Challenge Trek as part of its activities to raise money for the British Heart Foundation

The initiative for TMD's successful fundraising projects stems from the top. The company's Sales Director, Nigel Hann, for example, became top fundraiser, after completing the daunting task of cycling the 360 miles from Lands End to London over four days – a journey that, in Nigel's own words, 'at times took its toll both physically and mentally'.

Said Nigel: "Although we are at the very leading edge of defence microwave, communications, and scientific, quantum-enabled technology we are, nevertheless, a down-to-earth company with a very altruistic view. We take our responsibility to the wider community very seriously and see our fundraising projects as part of this worthy principle. We are already looking at ways of raising money for next year – a year hopefully free of Covid-19!!"

TMD Technologies Limited – the leaders in scientific and technical microwave and RF innovation

TMD's headquarters design and manufacturing facility in West London, UK.

With a heritage dating back to the 1940s, TMD Technologies Limited (TMD) is a world-class designer and manufacturer of professional microwave and RF products. At the company headquarters in Hayes, West London it produces specialised transmitters, amplifiers, microwave power modules (MPMs), high voltage power supplies, microwave tubes and transponders for radar, EW and communications applications. A previous twice Queen's Award winner, it also produces a range of advanced instrumentation microwave amplifiers for EMC testing, scientific and medical applications.

TMD is also making on-going and substantial investment in the development of quantum-enabled technology under the UK National Quantum Technologies Programme (UK-NQTP).

TMD Technologies, LLC, USA

TMD Technologies, LLC is the US subsidiary of TMD Technologies Limited. Based in Baltimore, Maryland, it provides complete technical and commercial support to TMD's customers in the USA and offers a comprehensive product repair centre.

The Sales and Business Development team is engaged with promoting the whole range of TMD's products, as well as identifying new business development opportunities in the United States.
